

Huawei Technologies South Africa (PTY) Limited Product Warranty

This Limited Product Warranty covers the “Covered Products” defined in the table below, is valid only for the duration of the applicable “Warranty Period” defined in the table below and is subject to the following terms and conditions:

Warranty Specification for Smart String Energy Storage System

Product	Warranty Period	Minimum Through Output Energy (For 5kWh battery module)	Warranty Extension
LUNA2000	10 years	16.45MWh@60% EOL	Not Applicable
iSitePower-M	10 years	13.17 MWh@60% EOL	Not Applicable

Notices:

1. Huawei warrants 10 years includes 5 years of basic warranty and 5 years extended warranty, that indicates no additional warranty extension
2. that the product retains sixty percent (60%) of Usable Energy either for ten (10) years (Luna2000) or ten (10) years (iSitePower-M) from the dispatch from Huawei, or for a Minimum Through Output Energy which is calculated from the purchasing date by end user, whichever comes first.
3. Battery warranty is defined as when the battery pack reaches the warranty period or the life cycle discharge is completed, the remaining capacity EOL meets the specification requirements, and the first comes into effect; the power module DCDC only involves the warranty period and has nothing to do with the battery performance. The battery pack and power module provide independent warranty.
4. Capacity test conditions: at an ambient temperature of $25^{\circ}\text{C}\pm 3^{\circ}\text{C}$, after charging to 100% SOC, let it stand for 10 minutes, and discharge the tested battery module at a set current of 0.2C to the discharge termination voltage, and record the amount of electricity released in the process.
5. In order to remotely upgrade the latest firmware to ensure battery life, the PV system with battery is highly recommended to connect to the Huawei FusionSolar SmartPV management system. For energy storage products that are not connected to the network, the battery cell damage caused by failure to upgrade in a timely manner is not covered by the warranty.
6. After the battery is purchased by the end user, the installation needs to be completed within one month. If the battery fails, it needs to be reported within one month. The battery module damage caused by the negligence of battery that cannot be charged for a long time will not be covered by the warranty.
7. The operation and service life of battery are related to the working temperature. Please install the battery at a temperature equal to or better than the ambient temperature. The recommended working temperature for battery is $15\sim 30^{\circ}\text{C}$.

Standard Warranty Extension Procedure
